amending Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) as regards Annex XVII

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC¹, and in particular Article 131 thereof,

Whereas:

- (1) Council Directive 76/769/EEC of 27 July 1976 on the approximation of the laws, regulations and administrative provisions of the Member States relating to restrictions on the marketing and use of certain dangerous substances and preparations² established in its Annex I restrictions for certain dangerous substances and preparations. Regulation (EC) No 1907/2006 repeals and replaces Directive 76/769/EEC with effect from 1 June 2009. Annex XVII to that Regulation replaces Annex I to Directive 76/769/EEC.
- (2) Article 67 of Regulation (EC) No 1907/2006 provides that substances, mixtures or articles may not be manufactured, placed on the market or used unless they comply with the conditions of any restrictions laid down in their regard in Annex XVII.
- (3) Directive 2006/122/EC of the European Parliament and of the Council of 12 December 2006 amending for the 30th time Council Directive 76/769/EEC (perfluorooctane sulfonates (PFOS))³ and Commission Directive 2006/139/EC of 20 December 2006 amending Council Directive 76/769/EEC as regards restrictions on

the marketing and use of arsenic compounds for the purpose of adapting its Annex I to technical progress⁴ amending Annex I to Directive 76/769/EC were adopted shortly before Regulation (EC) No 1907/2006 was adopted, in December 2006, but the restrictions concerned have not yet been included in Annex XVII to that Regulation. Therefore Annex XVII should be amended to include the restrictions corresponding to Directives 2006/122/EC and 2006/139/EC as otherwise the restrictions concerned will be repealed on 1 June 2009.

- (4) Pursuant to Article 137(3) of Regulation (EC) No 1907/2006, any amendment to the restrictions adopted under Directive 76/769/EEC from 1 June 2007 is to be incorporated in Annex XVII to that Regulation with effect from 1 June 2009.
- (5) Directive 2007/51/EC of the European Parliament and of the Council amending Council Directive 76/769/EEC relating to restrictions on the marketing of certain measuring devices containing mercury⁵ was adopted on 25 September 2007. Decision 1348/2008/EC of the European Parliament and Council amending Council Directive 76/769/EEC as regards restrictions on the marketing and use of 2-(2-methoxyethoxy)ethanol, 2-(2-butoxyethoxy)ethanol, methylenediphenyl diisocyanate, cyclohexane and ammonium nitrate⁶ was adopted on 16 December 2008. The restrictions concerned have not yet been included in Annex XVII to that Regulation. Annex XVII should be amended to incorporate the restrictions on certain measuring devices containing mercury adopted under Directive 2007/51/EC and the restrictions on 2-(2-methoxyethoxy)ethanol, 2-(2-butoxyethoxy)ethanol, methylene-diphenyl diisocyanate, cyclohexane and ammonium nitrate adopted under Decision 1348/2008/EC.
- (6) Account should be taken of the relevant provisions of Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directive 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006⁷.
- (7) Since the provisions of Title VIII of Regulation (EC) No 1907/2006 and in particular Annex XVII are to be directly applicable from 1 June 2009, the restrictions should be clearly drafted in order to allow operators and enforcement authorities to apply them correctly. Therefore the drafting of the restrictions should be reviewed. The terminology for the different entries should be harmonised and made more coherent with the definitions contained in Regulation (EC) No 1907/2006.
- (8) Council Directive 96/59/EC of 16 September 1996 on the disposal of polychlorinated biphenyls and polychlorinated terphenyls (PCB/PCT)⁸ requires that equipment containing PCBs and PCTs is decontaminated and disposed of as soon as possible and sets the conditions for the decontamination of equipment containing those substances. Therefore the entry in Annex XVII to Regulation (EC) 1907/2006 concerning PCTs should not include provision concerning equipment containing PCTs as that is fully regulated under Directive 96/59/EC.

⁷ OJ L 353, 31.12.2008, p.1.

⁸ OJ L 243, 24.9.1996, p. 31.

- (9) The existing restrictions for the substances 2-naphthylamine, benzidine, 4-nitrobiphenyl, 4-aminobiphenyl are ambiguous as it is unclear whether the prohibition concerns only the supply to the general public or also the supply to professional users. These should be clarified. Since Council Directive 98/24/EC of 7 April 1998 on the protection of the health and safety of workers from the risks related to chemical agents⁹ prohibits the production, manufacture and use at work of those substances, the restrictions in Annex XVII to Regulation (EC) No 1907/2006 relating to those substances should be consistent with Directive 98/24/EC.
- (10) The substances carbon tetrachloride and 1,1,1-trichloroethane are severely restricted under Regulation (EC) No 2037/2000 of the European Parliament and of the Council of 29 June 2000 on substances that deplete the ozone layer¹⁰. Regulation (EC) No 2037/2000 imposes for carbon tetrachloride a prohibition with exceptions, and for 1,1,1-trichloroethane a complete prohibition. Restrictions on carbon tetrachloride and 1,1,1-trichloroethane in Annex XVII to Regulation (EC) 1907/2006 are therefore superfluous and should be deleted.
- (11) Since mercury in batteries is regulated under Directive 2006/66/EC of the European Parliament and of the Council of 6 September 2006 on batteries and accumulators and waste batteries and accumulators¹¹, the provisions on mercury in batteries currently contained in Annex XVII to Regulation (EC) No 1907/2006 are superfluous and should therefore be deleted.
- (12) Pursuant to Article 2(2) of Regulation (EC) No 1907/2006, waste is considered not to be a substance, a mixture, or an article within the meaning of Article 3 of Regulation (EC) No 1907/2006. Therefore since waste is not covered by the restrictions under that Regulation, provisions in Annex XVII thereto excluding waste are redundant and should be deleted.
- (13) Certain restrictions in Annex XVII to Regulation (EC) 1907/2006 should be modified in order to take into account the definitions of “use” and “placing on the market” contained in Article 3 of that Regulation.
- (14) The entry in Annex I to Directive 76/769/EEC concerning asbestos fibres included an exemption for diaphragms containing chrysotile. It should be specified that this exemption will be reviewed following receipt of reports that Member States who are making use of this exemption will have to submit. Moreover in the light of the definition of “placing on the market” in Regulation (EC) No 1907/2006, Member States should be able to allow the placing on the market of some articles containing such fibres where the articles were already installed or in service before 1 January 2005, under specific conditions ensuring a high level of protection of human health
- (15) It should be made clear that, for substances which have been incorporated in Annex XVII to Regulation (EC) No 1907/2006 as a consequence of restrictions adopted in the framework of Directive 76/769/EEC (Entries 1 to 58), the restrictions do not apply to storage, keeping, treatment, filling into containers, or transfer from one container to

another of the substances for export, unless the manufacture of the substances is prohibited.

- (16) Unlike Directive 76/769/EEC, Regulation (EC) No 1907/2006 defines the term “article”. In order to cover the same items as provided for in the original restriction on Cadmium, the term “mixtures” should be added in some of the provisions.
- (17) It should be made clear that the restrictions incorporated in Annex XVII to Regulation (EC) No 1907/2006 on the marketing of certain measuring devices containing mercury do not apply to devices already in use in the Community at the time of entry into force of the restriction.
- (18) In the entries in Annex XVII to Regulation (EC) 1907/2006 for the substances diphenylether, pentabromo derivatives and diphenylether, octabromo derivatives, it should be provided that the restrictions do not apply to articles already in use at the date from which the restriction was to apply as those substances were incorporated in articles which have a long lifecycle and are sold on the second hand market, such as aeroplanes and vehicles. Moreover, since the use of the substances in electrical and electronic equipments is regulated under Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003 on the restriction of the use of certain hazardous substances in electrical and electronic equipment¹² that equipment should not be subject to the restrictions concerned.
- (19) It should be made clear in the restriction on nonylphenol and nonylphenol ethoxylate that the validity of existing national authorisations for pesticides and biocidal products containing nonylphenol ethoxylate as co-formulant should not be affected, as provided for in Article 1(2) of Directive 2003/53/EC of the European Parliament and of the Council of 18 June 2003 amending for the 26th time Council Directive 76/769/EEC relating to restrictions on the marketing and use of certain dangerous substances and preparations (nonylphenol, nonylphenol ethoxylate and cement)¹³.
- (20) It should be made clear that the restriction incorporated in Annex XVII to Regulation (EC) No 1907/2006 concerning perfluorooctane sulfonates does not apply to products which were already in use in the Community when the restriction entered into force.
- (21) The measures provided for in this Regulation are in accordance with the opinion of the Committee established under Article 133 of Regulation (EC) No 1907/2006,

HAS ADOPTED THIS REGULATION:

ANNEX

Annex XVII to Regulation (EC) No 1907/2006 is amended as follows:

(1) The title is replaced by the following:

“Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles”.

(2) The table setting out the designation of the substances, groups of substances and mixtures and the conditions of restriction is replaced by the following:

“For substances which have been incorporated in this Annex as a consequence of restrictions adopted in the framework of Directive 76/769/EEC (Entries 1 to 58), the restrictions shall not apply to storage, keeping, treatment, filling into containers, or transfer from one container to another of these substances for export, unless the manufacture of the substances is prohibited.

Column 1	Column 2
Designation of the substance, of the group of substances or of the mixture	Conditions of restriction
1. Polychlorinated terphenyls (PCTs)	Shall not be placed on the market, or used: <ul style="list-style-type: none">– as substances,– in mixtures, including waste oils, or in equipment, in concentrations greater than 50 mg/kg (0,005 % by weight).
2. Chloroethene (vinyl chloride) CAS No 75-01-4 EC No 200-831-0	Shall not be used as propellant in aerosols for any use. Aerosols dispensers containing the substance as propellant shall not be placed on the market.
3. Liquid substances or mixtures, which are regarded as dangerous according to the definitions in Council Directive 67/548/EEC and Directive 1999/45/EC.	1. Shall not be used in: <ul style="list-style-type: none">– ornamental articles, intended to produce light or colour effects by means of different phases, for example in ornamental lamps and ashtrays,– tricks and jokes,– games for one or more participants, or any article intended to be used as such, even with ornamental aspects. 2. Articles not complying with paragraph 1 shall not be placed on the market. 3. Shall not be placed on the market if they contain a colouring agent unless required for fiscal reasons or perfume or both and if they: <ul style="list-style-type: none">– present an aspiration hazard and are labelled with R65 or H304, and– can be used as fuel in decorative lamps, and

	<p>– are packaged in containers of a capacity of 15 litres or less.</p> <p>4. Without prejudice to the implementation of other Community provisions relating to the classification, packaging and labelling of substances and mixtures, suppliers shall ensure before the placing on the market that the packaging of substances and mixtures covered by paragraph 3, where intended for use in lamps, is marked visibly, legibly and indelibly as follows:</p> <p>‘Keep lamps filled with this liquid out of the reach of children’.</p>
<p>4. Tris (2,3 dibromopropyl) phosphate</p> <p>CAS No 126-72-7</p>	<p>1. Shall not be used in textile articles, such as garments, undergarments and linen, intended to come into contact with the skin.</p> <p>2. Articles not complying with paragraph 1 shall not be placed on the market.</p>
<p>5. Benzene</p> <p>CAS No 71-43-2</p> <p>EC No 200-753-7</p>	<p>1. Shall not be used in toys or parts of toys where the concentration of benzene in the free state is greater than 5 mg/kg (0,0005 %) of the weight of the toy or part of toy.</p> <p>2. Toys and parts of toys not complying with paragraph 1 shall not be placed on the market.</p> <p>3. Shall not be placed on the market, or used,</p> <ul style="list-style-type: none"> – as a substance, – as a constituent of other substances, or in mixtures, in concentrations equal to, or greater than, 0,1 % by weight. <p>4. However, paragraph 3 shall not apply to:</p> <ul style="list-style-type: none"> (a) motor fuels which are covered by Directive 98/70/EC. (b) substances and mixtures for use in industrial processes not allowing for the emission of benzene in quantities in excess of those laid down in existing legislation.
<p>6. Asbestos fibres</p> <p>(a) Crocidolite</p> <p>CAS No 12001-28-4</p> <p>(b) Amosite</p> <p>CAS No 12172-73-5</p> <p>(c) Anthophyllite</p>	<p>1. The manufacture, placing on the market and use of these fibres and of articles containing these fibres added intentionally is prohibited.</p> <p>However, Member States may exempt the placing on the market and use of diaphragms containing chrysotile (point (f)) for existing electrolysis installations until they reach the end of their service life, or until suitable asbestos-free substitutes become available, whichever is the sooner.</p> <p>By 1 June 2011 Member States making use of this exemption shall provide a report to the Commission on the availability</p>

The Commission shall make this information publicly available.</p> <p>Following receipt of those reports, the Commission shall request the Agency to prepare a dossier in accordance with Article 69 with a view to prohibit the placing on the market and use of diaphragms containing chrysotile.</p> <p>2. The use of articles containing asbestos fibres referred to in paragraph 1 which were already installed and/or in service before 1 January 2005 shall continue to be permitted until they are disposed of or reach the end of their service life. However, Member States may, for reasons of protection of human health, restrict, prohibit or make subject to specific conditions, the use of such articles before they are disposed of or reach the end of their service life.</p> <p>Member States may allow placing on the market of articles in their entirety containing asbestos fibres referred to in paragraph 1 which were already installed and/or in service before 1 January 2005, under specific conditions ensuring a high level of protection of human health. Member States shall communicate these national measures to the Commission by 1 June 2011. The Commission shall make this information publicly available.</p> <p>3. Without prejudice to the application of other Community provisions on the classification, packaging and labelling of substances and mixtures, the placing on the market and use of articles containing these fibres, as permitted according to the preceding derogations, shall be permitted only if suppliers ensure before the placing on the market that articles bear a label in accordance with Appendix 7 to this Annex.</p>
<p>7. Tris(aziridinyl)phosphinoxide</p> <p>CAS No 545-55-1 EC No 208-892-5</p>	<p>1. Shall not be used in textile articles, such as garments, undergarments and linen, intended to come into contact with the skin.</p> <p>2. Lead sulphates:</p> <p>(a) PbSO₄ CAS No 7446-14-2 EC No 231-198-9</p> <p>(b) Pb_x SO₄</p>	<p>Shall not be placed on the market, or used, as substances or in mixtures, where the substance or mixture is intended for use as paint.</p> <p>However, Member States may, in accordance with the provisions of ILO Convention 13 on the use of white lead and sulphates of lead in paint, permit the use on their territory of the substance or mixture for the restoration and maintenance</p>

<p>CAS No 15739-80-7 EC No 239-831-0</p>	<p>of works of art and historic buildings and their interiors.</p>
<p>18. Mercury compounds</p>	<p>Shall not be placed on the market, or used, as substances or in mixtures where the substance or mixture is intended for use:</p> <p>(a) to prevent the fouling by micro-organisms, plants or animals of:</p> <ul style="list-style-type: none"> – the hulls of boats, – cages, floats, nets and any other appliances or equipment used for fish or shellfish farming, – any totally or partly submerged appliances or equipment; <p>(b) in the preservation of wood;</p> <p>(c) in the impregnation of heavy-duty industrial textiles and yarn intended for their manufacture;</p> <p>(d) in the treatment of industrial waters, irrespective of their use.</p>
<p>18a. Mercury</p> <p>CAS No 7439-97-6 EC No 231-106-7</p>	<p>1. Shall not be placed on the market:</p> <p>(a) in fever thermometers;</p> <p>(b) in other measuring devices intended for sale to the general public (such as manometers, barometers, sphygmomanometers, thermometers other than fever thermometers).</p> <p>2. The restriction in paragraph 1 shall not apply to measuring devices that were in use in the Community before 3 April 2009. However Member States may restrict or prohibit the placing on the market of such measuring devices.</p> <p>3. The restriction in paragraph 1(b) shall not apply to:</p> <p>(a) measuring devices more than 50 years old on 3 October 2007,</p> <p>(b) barometers (except barometers within point (a)) until 3 October 2009,</p> <p>4. By 3 October 2009 the Commission shall carry out a review of the availability of reliable safer alternatives that are technically and economically feasible for mercury containing sphygmomanometers and other measuring devices in healthcare and in other professional and industrial uses. On the basis of this review or as soon as new information on reliable safer alternatives for sphygmomanometers and other measuring devices containing mercury becomes available, the Commission shall, if appropriate, present a legislative proposal to extend the restrictions in paragraph 1 to sphygmomanometers and other measuring devices in</p>

	healthcare and in other professional and industrial uses, so that mercury in measuring devices is phased out whenever technically and economically feasible.
19. Arsenic compounds	<p>1. Shall not be placed on the market, or used, as substances or in mixtures where the substance or mixture is intended for use to prevent the fouling by micro-organisms, plants or animals of:</p> <ul style="list-style-type: none"> – the hulls of boats, – cages, floats, nets and any other appliances or equipment used for fish or shellfish farming, – any totally or partly submerged appliances or equipment. <p>2. Shall not be placed on the market, or used, as substances or in mixtures where the substance or mixture is intended for use in the treatment of industrial waters, irrespective of their use.</p> <p>3. Shall not be used in the preservation of wood. Furthermore, wood so treated shall not be placed on the market.</p> <p>4. By way of derogation from paragraph 3:</p> <p>(a) Relating to the substances and mixtures for the preservation of wood: these may only be used in industrial installations using vacuum or pressure to impregnate wood if they are solutions of inorganic compounds of the copper, chromium, arsenic (CCA) type C and if they are authorised in accordance with Article 5(1) of Directive 98/8/EC. Wood so treated shall not be placed on the market before fixation of the preservative is completed.</p> <p>(b) Wood treated with CCA solution in accordance with point (a) may be placed on the market for professional and industrial use provided that the structural integrity of the wood is required for human or livestock safety and skin contact by the general public during its service life is unlikely:</p> <ul style="list-style-type: none"> – as structural timber in public and agricultural buildings, office buildings, and industrial premises, – in bridges and bridgework, – as constructional timber in freshwater areas and brackish waters, for example jetties and bridges, – as noise barriers, – in avalanche control, – in highway safety fencing and barriers, – as debarked round conifer livestock fence posts, – in earth retaining structures, – as electric power transmission and telecommunications poles, – as underground railway sleepers. <p>(c) Without prejudice to the application of other Community</p>

	<p>provisions on the classification, packaging and labelling of substances and mixtures, suppliers shall ensure before the placing on the market that all treated wood placed on the market is individually labelled “For professional and industrial installation and use only, contains arsenic”. In addition, all wood placed on the market in packs shall also bear a label stating “Wear gloves when handling this wood. “FOREWORD

Explanations of column headings:

Substances:

The name corresponds to the International Chemical Identification used for the substance in Part 3 of Annex VI to Regulation (EC) No 1272/2008 of the European Parliament and of the Council on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006.

Whenever possible, substances are designated by their IUPAC names. Substances listed in EINECS (European Inventory of Existing Commercial Chemical Substances), ELINCS (European List of Notified Substances) or the list of "No-longer-polymers" are designated using the names in these lists. Other names, such as usual or common names, are included in some cases. Whenever possible, plant protection products and biocides are designated by their ISO names.

Entries for groups of substances:

A number of group entries are included in Part 3 of Annex VI to Regulation (EC) No 1272/2008. In these cases, the classification requirements will apply to all substances covered by the description.

In some cases, there are classification requirements for specific substances that would be covered by the group entry. In such cases a specific entry is included in Part 3 of Annex VI to Regulation (EC) No 1272/2008 for the substance and the group entry will be annotated with the phrase "except those specified elsewhere in Annex VI to Regulation (EC) No 1272/2008".

In some cases, individual substances may be covered by more than one group entry. In these cases, the classification of the substance reflects the classification for each of the two group entries. In cases where different classifications for the same hazard are given, the most severe classification will be applied.

Index number:

The Index number is the identification code given to the substance in Part 3 of Annex VI to Regulation (EC) No 1272/2008. Substances are listed in the Appendix according to this index number.

EC numbers:

The EC number, i.e. EINECS, ELINCS or NLP, is the official number of the substance within the European Union. The EINECS number can be obtained from the European Inventory of Existing Commercial Chemical Substance (EINECS). The ELINCS number can be obtained from the European List of Notified Substances. The NLP number can be obtained from the list of "No-longer-polymers". These lists are published by the Office for Official Publications of the European Communities.

The EC number is a seven-digit system of the type XXX-XXX-X which starts at 200-001-8 (EINECS), at 400-010-9 (ELINCS) and at 500-001-0 (NLP). This number is indicated in the column entitled "EC No".

CAS number:

Chemical Abstracts Service (CAS) numbers have been defined for substances to help in their identification.

Notes:

The full text of the notes can be found in Part 1 of Annex VI to Regulation (EC) No 1272/2008.

The notes to be taken into account for the purposes of this Regulation are the following:

Note A:

Without prejudice to Article 17(2) of Regulation (EC) No 1272/2008, the name of the substance must appear on the label in the form of one of the designations given in Part 3 of Annex VI to that Regulation.

In that Part, use is sometimes made of a general description such as "... compounds" or "... salts". In this case, the supplier who places such a substance on the market is required to state on the label the correct name, due account being taken of Section 1.1.1.4 of Annex VI to Regulation (EC) No 1272/2008.

Note C:

Some organic substances may be marketed either in a specific isomeric form or as a mixture of several isomers.

Note D:

Certain substances which are susceptible to spontaneous polymerisation or decomposition are generally placed on the market in a stabilised form. It is in this form that they are listed in Part 3 of Annex VI to Regulation (EC) No 1272/2008.

However, such substances are sometimes placed on the market in a non-stabilised form. In this case, supplier who places such a substance on the market must state on the label the name of the substance followed by the words ‘non-stabilised’.

Note J:

The classification as a carcinogen or mutagen need not apply if it can be shown that the substance contains less than 0,1 % w/w benzene (EC No 200-753-7).

Note K:

The classification as a carcinogen or mutagen need not apply if it can be shown that the substance contains less than 0,1 % w/w 1,3-butadiene (EC No 203-450-8).

Note L:

The classification as a carcinogen need not apply if it can be shown that the substance contains less than 3 % DMSO extract as measured by IP 346.

Note M:

The classification as a carcinogen need not apply if it can be shown that the substance contains less than 0,005 % w/w benzo[a]-pyrene (EC No 200-028-5).

Note N:

The classification as a carcinogen need not apply if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen.

Note P:

The classification as a carcinogen or mutagen need not apply if it can be shown that the substance contains less than 0,1 % w/w benzene (EC No 200-753-7).

Note R:

The classification as a carcinogen need not apply to fibres with a length weighted geometric mean diameter, less two standard errors, greater than 6µm.”

- (4) In Appendices 1, 2, 3, 5 and 6, in the entries, in the column headed “notes”, references to notes E, H and S are deleted.
- (5) In Appendix 1, the heading is replaced by “Entry 28 – Carcinogens: category 1A (Table 3.1) /category 1 (Table 3.2)”.
- (6) Appendix 2 shall be amended as follows:
 - (a) The heading is replaced by “Entry 28 – Carcinogens: category 1B (Table 3.1) / category 2 (Table 3.2)”.
 - (b) In the entries index Nos. 024-017-00-8, 611-024-00-1, 611-029-00-9, 611-030-00-4 and 650-017-00-8, the words “Annex I to

Directive 67/548/EEC” shall be replaced by “Annex VI to Regulation (EC) No 1272/2008”.
