The Programme aims at constructing 70,000 biogas plants in Ethiopia, Kenya, Tanzania, Uganda, Senegal and Burkina Faso providing about half a million people access to a sustainable source of energy by the year 2013. The overall objective of the ABPP is to contribute to the achievement of the Millennium Development Goals through the dissemination of domestic biogas plants as a local, sustainable energy source through the development of a commercially viable, market-oriented biogas sector. The financial contribution of the Netherlands amounts to €30 million, covering approximately one third of the total programme costs. These funds are channelled through Hivos, which carries out the role of fund and programme manager, operating from an office in Nairobi. SNV will provide capacity building services in the six countries and take responsibility for knowledge management at supra-national level. Use will be made of knowledge generated by SNV through the setting-up of large-scale domestic biogas programmes in Asia.
